

Internet Service from the EPB

**Wow,
it's fast!**

What does your computer need to be able to use the EPB's Internet service?

While your computer doesn't have to be brand new, it does need a Network Interface Card (NIC). If you don't have one, or you're not sure, we can check it for you. You'll also need some free memory space for installation. Typically, this isn't a problem. We'll need to perform an installation on your computer (usually a one-time cost of \$30). That charge would appear on your next bill.

What's included with the monthly service?

You'll have unlimited access (through a cable modem we provide). No more keeping up with how long you've been "on." You'll get up to three email addresses at no additional charge. Also, if you have other EPB services (cable TV, digital, HD or telephone), none of these interfere with each other. You can watch TV, make a phone call and surf the net, all at the same time.

What will this cost?

EPB Internet service is \$26/month for speeds up to 2.5Mb. You can also move up to a much faster speed, 5Mb, for only \$36/month. This speed is great if you do a lot of gaming or downloading. The choice is up to you!

Note that EPB cable TV service is required for our Internet service. That's because that's how the signal is delivered – over the cable lines. That's also why it's so much faster than regular Internet service you may have had before with some other company. The EPB's service is the fastest in Barren County!

We have other fees for other services, but the best thing to do is just to contact us if you have a question. Call the EPB's Internet Dept. If we're already all on the phone, just leave us a detailed message. We'll be glad to get back in touch with you.

Call us at 651-8341, then choose "1" for the Internet Dept!

**Internet Service so fast you
just might get a speeding ticket!**
