

Internet Service from the EPB

**Wow,
it's fast!**

What does your computer need to be able to use the EPB's superior Internet service?

Your computer doesn't have to be brand new, but it does need a Network Interface Card (NIC). If you don't have one, or you're not sure, we can check it for you. You'll also need some free hard drive space for installation. Typically, this isn't a problem. We'll need to perform an installation on your computer (at a one-time cost of \$40*). That charge would appear on your next bill.

What's included with the monthly service?

You'll have unlimited access (through a cable modem we provide). You'll get up to three email addresses at no additional charge. Also, if you have other EPB services (cable TV, digital, HD), none of these interfere with each other. You can watch TV and surf the net, all at the same time.

What will this cost?

EPB Internet service is \$28/month for speeds up to 5Mbps (5 Megabits per second). You can also move up to a much faster speed, 10Mbps, for only \$38/month. This speed is perfect if you do a lot of gaming, downloading or video streaming. The choice is up to you!

As a new alternative, you may purchase Internet service WITHOUT getting cable TV service. 5Mbps is \$50/month, 10 Mbps is \$60/month. Call us for all the details.

We have other fees for other services, but the best thing to do is contact us if you have a question. Call the EPB's Internet Dept. If we're already all on the phone, just leave us a message. We'll be glad to get back in touch with you.

Call us at 651-8341, then choose "1" for the Internet Dept!

**Internet Service so fast you
just might get a speeding ticket!**
